PRODUCT OVERVIEW

PRODUCT NAME	Vehicle First Aid Kit Two Patient (VFAK2)
MANUFACTURER	Solution Based Innovation (SBI) Virginia Beach, VA SDVOSB
INTENDED END USERS	Law Enforcement Military Public Safety EMS Personnel
DEPLOYMENT PROFILE	Patrol Vehicles Tactical Vehicles Fleet Medical Readiness
STANDARDS	Meets & Exceeds ANSI/ISEA Z308.1-2021 Class A TCCC Aligned

PRODUCT DESCRIPTION

The Vehicle First Aid Kit Two Patient (VFAK2) is a vehicle-mounted medical kit designed to provide law enforcement, military, and public safety personnel with an easily accessible, quick-to-deploy trauma care solution. The preferred placement of the VFAK2 is mounted to the back of the headrest on the driver and passenger seats, though it can also be stored in the glove compartment. When combined with a second VFAK2, it will provide advanced trauma support to 4+ patients.

Developed in alignment with Tactical Combat Casualty Care (TCCC) Guidelines and lessons learned from the battlefield, the VFAK2 was specifically engineered to mitigate the three leading causes of preventable death from penetrating trauma: extremity hemorrhage (60%), tension pneumothorax (33%), and airway obstruction (6%). The kit meets and exceeds the ANSI/ISEA Z308.1-2021 Standard for Class A kits by incorporating additional bleeding control elements beyond ANSI and OSHA requirements.

The modular storage system includes trauma shears and nitrile gloves at the ready on one side, with a MOLLE/PALS-style panel on the opposite for additional tourniquets, ammunition, or PPE. Inside, one compartment covers basic first aid and community assistance while the other contains tactical trauma items -- giving every operator everything needed to save a life. A must-have for every patrol vehicle, on duty and off.

SUGGESTED CONTENTS — Single Kit (Two Patient)

- 2 x Tactical Windlass Tourniquet - Black
- 2 x Compressed Wound Packing Gauze - 3 in. x 5 yd.
- 2 x Abdominal Emergency Trauma Dressing
- 2 x Vented Chest Seal Twin Pack
